GO GREEN !

As a major global manufacturer of bathing products, we at Jaquar are well aware of our responsibilities. Conservation of precious water as a natural resource has long been the primary goal of our sustainability efforts to help preserve the living planet for our future generations. Go Green is a philosophy embraced by Jaquar as a tenet of its design and production system to save water.

Technology that **saves** water

Flow Restrictors

This is a revolutionary technology that lets your taps and showers save upto 80% of water without compromising on the flow.

Jaquar Flow Restrictors adjust the flow in both low and high pressure conditions and offer the same voluminous flow every time.

Flow rate options available:
1.4, 2.5, 4.0, 6.0,
8.0, 13 LPM

Flow Restrictor

Flow rate options available:
6.0, 8.0 & 12 LPM

Air Showers

Jaquar's Air Showers have a built-in air mixer that mixes air and water in a manner that makes shower drops lighter but voluminous. This revolutionary technology helps Jaquar air showers save up to 30% of water without compromising on the showering experience.

Choose from a wide range of Hand and Overhead Jaquar Air showers with single and multi-flow options.

70% Water + 30% Air
= 100% Rejuvenation

Pressmatic Faucets

Taps with technology that allows only a fixed quantity 1.5 ltrs. of water to flow with every press of its knob. This mechanism not only prevents water wastage during each use, but also provides ease of operation. Jaquar Pressmatic taps are recommended for bathrooms of high traffic locations like restaurants, clubs, hotels, colleges, hospitals, airports etc.

Sensor Faucets

Faucets with technology that allows water to flow only when you need it and shuts it as soon as you move your hands away, resulting in zero wastage of water. There's no better way to save water than when you don't need it e.g., while washing hands with soap, you can save water when lathering. Use Jaquar Sensor taps in high traffic areas like restaurants, clubs, hotels, colleges, hospitals, airports etc.

Dual Flush

Flushes that use more water than needed are the biggest water wastage culprits in every home. Jaquar's dual flushing systems enable you to use either a combination of 3/6 ltrs of water or 2/4 ltrs of water, depending on your water closet. Jaquar's beta valve is designed to save 50-60% of water every day.

Features

Advanced Rubit Technology

A feature that keeps showers clean and increases their longevity. Since the spray jets on the showers are made from elastic silicone, they ensure that no limescale deposits stick to the shower face. Even if they do, they can be easily rubbed off by hand or flannel.

Click Position System

All Jaquar multi-function showers feature the convenient click mechanism. You can feel and hear the click while changing the function of the shower sprays.

Thermo Insulation

Jaquar's insulated shower systems prevent scalding by not heating up the shower body.

Jaquar Booster Technology

Jaquar Booster Technology creates the sensation of a full shower regardless of the water pressure.

Safety Vacuum Breaker

This is one of the important safety features installed in Jaquar whirlpools. In case of blockage in the suction point the motor switches off automatically.

No Bacteria Formation.

Fresh Water Everytime
The water pipes connect via Y-shaped housings, creating a bow which ensures the complete drainage of water. Unpleasant odours and, even worse, bacteria are thus avoided.

Environment Friendly

The pipes are made from special Food Grade PVC. These pipes have an anti bacterial coating on the inner side so that even if some drops of water stay behind after the tub is drained, there won't be any bacteria formation in the water droplets.

3 Tier Test

Each and every Jaquar whirlpool goes through a functional test with hot water after which it is tested on a European test machine for earthing resistance, insulation test and a high voltage test.

Easy To Use

The electronic keypad control activates all the hydromassage functions, to regulate Airpool intensity. All electronic parts can be installed and removed on site, thus making after-sales, what it should ideally be - a service !

Water jets

The effectiveness of the hydromassage is enhanced by the exclusive the water flow can be adjusted in intensity and direction to suit personal needs, in order to gently massage delicate areas.

Airpool jet

The airpool jets provide a gentle and delicate massage on your spine, which increases the sensation of warmth in the body and has beneficial effects on the back. The air bubbles open the insulation layer by oxygenating the body.

PMMA sheet

Jaquar whirlpools are made of the highest grade of PMMA acrylic sheet

Air suction valve

To enable suction of atmospheric air, and distribute it to each and every water jet to boost the jet pressure.

Built-in Bathtubs

The more common and practical choice in bathtubs, the built-in or 'drop-in' bathtub is preferred wherever space is at a premium. Because they are placed adjacent to a wall and tucked away, built-in bathtubs are space-economical and can also offer additional storage on the surrounding ledges or the walls next to them. Perfect for placing an aromatic candle or two while you soak in the bubble bath and unwind!

Spas

Spas are a wonderful way to relax and restore equilibrium. Jaquar's spa models are technological marvels whose 'well being circuits' comprise of various seats and a common footrest in the centre. Each seat is strategically fitted with different types of massage jets in various positions, oriented to massage different parts of the body. By moving from one seat to the other, one can enjoy a complete and satisfying massage that stimulates and relaxes all parts of the body. Cushioned headrests, ergonomic seats and a host of high performance features make this the ultimate home spa experience.

Why Jaquar Spas?

More economy

An array of energy efficient technologies make our spas more economical to run and easier to enjoy more often without worrying about power consumption.

Cleaner, healthier water

Unlike swimming pools, Jaquar spas don't use harsh chemicals that can be harmful for the skin. Our spas feature advanced water treatment technologies to ensure the cleanest, clearest water.

A superior experience

Jaquar spas have superior hydrotherapy performance and features that are usually reserved for the world's most expensive spas.

Guaranteed to last longer

Every Jaquar spa is hand crafted using industry-leading techniques and materials, which is why we can guarantee the spa shell for 10 years.

Easier to maintain

Jaquar spas give you the ultimate in easy care spa ownership without needing to spend much time on maintenance, or have a degree in chemistry to enjoy crystal clear water.

Features

Technologies that save energy and money

To let you enjoy using them without worrying about the power bill, Jaquar spas come with a whole range of energy efficient technologies.

Cabinet Insulation

Jaquar spas have insulation in the perimeter of their cabinets to maintain the warmth of the water, and the spa's plumbing and equipment, further reducing your energy costs.

Intelligent Thermal Regulation

Allows the spa to tune itself to its environment, day-to-day and season-to-season, thus reducing your heating costs by up to 20%.

Smart meter ready

Using Power Save software, Jaquar spas can be designed to do the filtering and heating when power costs are at their lowest. You can tailor the operation of your Jaquar spa to take advantage of smart meter technology and reduce your running costs.

Micro Filtration

The top priority is to remove waterborne contaminants.

Hydroflow jets

A Jaquar spa's hydroflow jets are designed to maximise jet pressure and provide a world-class hydrotherapy experience giving different massage action in each seat.

Ergonomic design

Jaquar spas are designed to maximise your comfort. Jets are positioned to massage tired muscles. The controls are within easy reach. And relaxation comes automatically.

Easy to operate

Jaquar spa control systems are intuitive and easy to operate and offer maximum flexibility and control. The top side panel controls most functions with one touch of a button. More advanced controls can be accessed through the simple English menu functions.

Two lounge seats

To avoid arguments over who gets the spa's lounge (usually the most comfortable and most coveted seat in the spa), most Jaquar spas have two luxurious hydrotherapy loungers.

Individual pressure control

To ensure complete satisfaction for all, each seat in your Jaquar spa can be controlled with the seat's pressure control dial. In addition, most jets can be individually controlled, directing pressure to where you need it most.

Dynamic lighting options

Flood lighting, jet lights, backlit drink holders and water features, waterline illumination and access lighting can all be added to your Jaquar spa to enhance your experience. Lighting programs can be controlled using the spa's topside controller.

Neck therapy collar

Optional on most Jaquar models, the neck therapy collar incorporates jets specially designed to eliminate stress and tension carried in the neck and shoulder area. Opt for the neck therapy collar to soothe away the stresses of your day.

Spa Health Indicator

Your Jaquar Spa is also equipped with an early warning 'Spa Health Indicator' light. This light comes on to indicate that the product needs service, maintenance or attention to verify any fault that may arise, and to prevent chances of damage.

Saunas

A Sauna is a bathhouse or room, usually made of wood, which uses dry heat to induce perspiration, with steam being produced by pouring water on heated stones. Perspiration or sweating is one of the main ways our bodies get rid of the traces of hundreds of toxins that accumulate inside us from pesticides, drugs and manmade chemicals. 15 minutes in a Jaquar sauna can help us sweat as much as we might otherwise do over an entire day or more. And the benefits of this aid in many medical conditions.

Why Jaquar Saunas?

Detoxification

Saunas stimulate the body to release fat-soluble toxins, heavy metals, and other toxic chemicals in sweat via pores more effectively than any other form of heat therapy or exercise. Reports have shown that it can relieve the symptoms of drug-induced lupus. The list of chemicals claimed to be removed from the body includes: mercury, lead, copper, cadmium, manganese, sodium, chloride, arsenic, nickel, benzenes, street drugs, prescription drugs, anaesthetics, cholesterol, urea, nicotine, sulfuric acid.

Immune System Enhancement

A typical sauna session will cause a brief 1 to 3 degree F increase in body temperature. Fever is the body's defence against bacteria, microbes and consequent infection. The production of white blood cells by the bone marrow and killer T cells by the thymus results in boosting immunity, overall.

Stress Relief

Continuous strain on the autonomic nervous system leads to a high level of stress, one of the elusive causes of many chronic diseases.

Pain Relief and Control

It helps in relieving muscular pain, cardiovascular and other skin conditions

Skin Cleaning and Rejuvenation

Saunas open clogged pores allowing for removal of dirt, oil, and makeup. In addition, there are improvements in skin problems such as acne, rashes, burns, eczema and psoriasis. Scars, even keloids, may be gradually softened.

Textured & Frosted Glass

Textured glass has a repeating shallow pattern that is available in different styles. It enhances the overall look of the bathroom. Several styles to choose from :

Textured & Frosted Glass

Features:

- Permanent. Images won't fade, peel, scratch or crack
- Control over opacity

Textured Glass:

Unique and Handcrafted designs on the glass. As the patterns are not geometric in shape, each and every piece of enclosure are unique and different to each other. The textured designs on the glass are patterns without losing the transparency of the glass.

Frosted Glass:

The sand blasted frosted glass makes the enclosure opaque which provides more privacy condition. The geometric frosted shaped provide more option of design to a shower enclosure.
